EXECUTIVE SUMMARY

- DevOps-focused student with hands-on experience in AWS, Azure, Kubernetes, and CI/CD pipeline design.
- Skilled in building scalable cloud architectures and automating deployments using Docker and Jenkins.
- Experienced in DevSecOps practices, including security scanning and secure backend development with FastAPI.

EXPERIENCE

DevOps Intern

Oct 2025 – Mar 2026

Shamgar Software Solutions

India

- Engineered and deployed ML inference services as production-ready APIs using FastAPI, enabling real-time prediction workflows.
- Designed and implemented a scalable data pipeline for BCI systems, handling data ingestion, processing, and storage.
- Deployed an AI-based agricultural application on AWS with a focus on scalability, availability, and performance optimization.
- Containerized applications using Docker and configured cloud infrastructure to support reliable deployments.
- Collaborated on building cloud-native architectures emphasizing scalability, monitoring, and maintainability.

Cloud Computing Intern

Oct 2025 – Dec 2025

Elevate Labs (Skill India) – Best Performer

India

- Developed a cloud-based file management system with secure upload, retrieval, and deletion features.
- Built REST APIs using Node.js and implemented JWT-based authentication and role-based access.
- Integrated MongoDB Atlas and deployed application with CI/CD and secure endpoints.
- Achieved **Best Performer** recognition for outstanding contribution.

Angular Developer Intern

Oct 2025 – Dec 2025

Infosys Springboard Virtual Internship 6.0

India

- Developed civic issue reporting platform with real-time tracking and role-based dashboards.
- Built 8+ Angular components and integrated 15+ REST APIs, improving response time by 30%.
- Designed scalable database schema for users, complaints, and interactions.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

AWS Certified CloudOps Administrator – Associate

Azure Administrator – Associate (AZ-104)

Azure DevOps Engineer – Expert (AZ-400)

RHCSA (Red Hat Certified System Administrator)

AWS Cloud Quest – Cloud Practitioner

PROJECTS

End-to-End DevSecOps Pipeline on AWS | Jenkins, EKS, Docker, Trivy, SonarQube | GitHub

- Designed and implemented a CI/CD pipeline automating build, test, security scanning, and deployment workflows.
- Integrated SonarQube and Trivy for vulnerability detection and enforced quality gates for secure deployments.
- Containerized applications using Docker and deployed to Amazon EKS for scalable Kubernetes-based deployment.

Multi-Cloud DevSecOps CI/CD Pipeline | Azure DevOps, AWS EC2, Docker, Kubernetes | GitHub

- Built an end-to-end CI/CD pipeline using Azure DevOps with Kubernetes deployment.
- Configured AWS EC2 self-hosted agents and automated builds using Maven.
- Enabled multi-cloud deployment across AWS and Azure with Docker-based containerization.

Secure File Transfer & Encryption API | FastAPI, PostgreSQL, RSA, ECC

- Developed a secure API using hybrid encryption (RSA + ECC) for encrypted file transfer and key management.
- Built REST endpoints and designed backend architecture ensuring end-to-end encryption and data integrity.

TECHNICAL SKILLS

Programming: Python, Bash, Shell

Cloud Platforms: AWS (EC2, EKS, ECS, VPC, IAM, ALB, Auto Scaling, S3, CloudWatch), Azure (VMs, VNETs, Azure AD, AKS)

DevOps & Tools: Docker, Kubernetes (EKS, AKS), Jenkins, Git, GitHub, GitHub Actions, Azure DevOps, AWS CodePipeline, Trivy, SonarQube

Infrastructure: Load Balancing, NAT Gateway, Multi-AZ Architecture, CI/CD Pipeline Design

Operating Systems: Red Hat Enterprise Linux, Ubuntu

EDUCATION

KPR Institute of Engineering and Technology

Coimbatore, India

Bachelor of Engineering – Computer Science Engineering (CGPA: 7.8)

2024 – 2027

Sri Ramakrishna Polytechnic College

Coimbatore, India

Diploma in Computer Engineering (87%)

2021 – 2024
